

MISSING/STOLEN

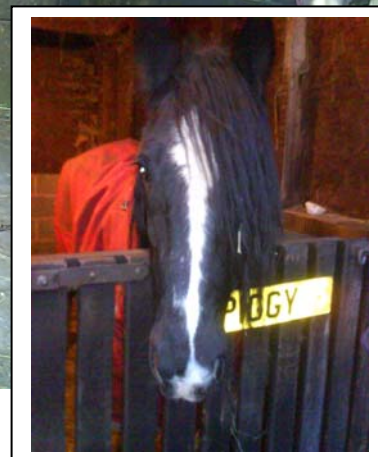

Due to new information we now believe she has been missing/stolen since mid February 2008

May still have a scar on face from a sarcoid but it could have faded by now though.

Has lumpy scars from mud fever in fetlock and pastern area on all legs worse on the back legs.

14.2hh Black Welsh cob cross mare
Star, stripe and snipe with 3 white socks.
Has heavy feathers but could have had them clipped.

Micro chip Number
958 000 000 510 887

She has medical problems and needs supplements everyday
She is anaemic, has COPD, suffers from chronic mud fever and has had sarcoids in the past.

Was in the Kent area but might not be now.
